1. Product Description

CELLPICK 5X TBE (Tris-borate-EDTA) DNA Sequencing Grade Solution is an ultra-pure electrophoresis buffer formulated specifically for high-resolution polyacrylamide and agarose gel electrophoresis of DNA and RNA fragments.

TBE buffer has a higher buffering capacity and provides sharper resolution for smaller DNA fragments (<2 kb) compared to TAE buffer. Manufactured under stringent quality control standards to ensure optimal performance in DNA sequencing and sensitive analytical workflows. Supplied in a 10 L bulk packaging format.
